Jan W. advice: Take 2 of your favourite t-shirts that you find comfortable. One could be a straight, looser fit, and one could be slightly tapered. You will be finding out what size would be most comfortable for you to wear. *Lay them on a table and measure:*

A. Body Length: Length is the front from high shoulder point (HSP) (or where shoulder seam meets the sleeve) to the bottom hem.

B. Chest: You can measure across the flat t-shirt (half measure)

or You can measure around your chest if you have a flexible tape measure (full measure)

C. Sleeve Length: Not changeable, but you can see how long the sleeve will be.

D. Compare your t-shirt measurements and pick a size according to the measurements on the chart. If in doubt go with the larger size.
